

VANNI

MADE IN ITALY, FOR SURE.

The vitality of colour
in the **COLOURS** line by VANNI

A line of extra thin acetate eyewear, designed for the female or unisex wearer, featuring linear and delicately contemporary shapes. A symphony of tones mixed with grace and liveliness, whose harmony is punctuated by the colour-contrast detail on the lug, that extends to meet with and continues onto the temples.

The raw material:

a combination of solid colour or transparent acetate, and classic tortoiseshell.

The stylistic detail:

on each model the colour pairings play out on the lug and on the temples, creating an overall bi-colour effect, the result of a delicate bonding of materials in contrasting tones.

Colours and shapes:

the feminine forms are classic and balanced, with a return to the rectangle and the traditional cat eye- in a softened version, and also in a distinctive mini round. The tortoiseshell bases are combined with details in green, sage, purple and red, in opaline or transparent versions.

VANNI Eyewear is Made in Italy, for sure.
