

A touch of class and refinement for the new season's collection of feminine eyewear proposing, beyond the pairing of exclusive VANNI acetates and milled metal, a series of glasses that combine the patterns of the WIRED, MAPS, TANGRAM, and RASTER acetates with tortoiseshell and monochrome acetate. A perfect technical integration between the different materials, a harmonious fusion made possible by production techniques on the leading edge of the industry.

A collection of elegant eyewear, refined in the composition of the materials and in the surprising chromatic pairings.

The raw material:

combinations of exclusive VANNI acetate and solid colour or transparent acetate.

The stylistic details:

the sophisticated combination of acetate on acetate, depending on the model, accentuates a delicate insert in exclusive material on the lug and temples, or inversely, proposes the exclusive acetate on the front, with the solid colour detailing on the lug.

The shapes and colours:

the feminine **SPIRIT** models propose large but balanced shapes, tending toward the butterfly. Blues, reds, greens, and ivory dominate the colour detailing on the lug.

VANNI Eyewear is Made in Italy, for sure.
