

VANNI

MADE IN ITALY, FOR SURE.

Sunglasses according to VANNI

A choice as strong as the models it presents: with its sunglasses for the new season, VANNI seeks to astonish. This time, without doubt, putting the accent on VANNity.

The Italian brand renowned for its exclusive acetates and for its original metal models is playing with fire, launching into a highly distinguished collection, to give life to designs in the unmistakable VANNI style.

VANNI Eyewear is Made in Italy, for sure.

The raw material:

exclusive VANNI block acetate, or steel.

The stylistic details:

VANNI sunglasses possess a transgressive spirit, revealed in the bright colours and sculptural shapes of the acetates and in the brilliantly coloured metal constructions of the **Colours** and **Remaster** families. Each pair of VANNI sunglasses presents a detail that renders the style unique.

Shapes and colours:

in the **metal Colours** collection, the original accentuated shapes are enhanced by double-framed constructions and vivid colour contrasts (in nuanced red or pink, but also white and turquoise).

The **acetate glasses in the Colours collection** are exaggerated and material, and bring back a selection of celebrated shapes (the 50s round as well as the 80s rectangular), transporting them into the present thanks to whimsical vitamin colours that range in hue from fuchsia to yellow to transparent turquoise, to a newly-launched original tortoiseshell in a yellow and brown flame pattern.

The newest styles from the **Remaster collection** propose large, feminine shapes in gold or black metal, with a thin sheath of tortoiseshell acetate or glittering silver hidden in the profile of the front, encompassing and embellishing the circle. The small oval glasses, for him and for her, display an innovative structure that holds the two circles together with a thin aerial bar, minimal but with character. The lenses are made from UV 400 nylon, in full tint or in mirrored shades, to guarantee the best protection from the sun's rays.

VANNI Eyewear is Made in Italy, for sure.
