

VANNI

MADE IN ITALY, FOR SURE.

VANNI UOMO

*The man who wears VANNI
accepts the challenges of a modern aesthetic*

The man who wears VANNI accepts the challenges of a modern aesthetic. A collection of glasses designed entirely for men, in unmistakable VANNI style. Studied for the discerning customer, from initial concept to final design and produced in the best Italian factories, VANNI UOMO is a collection of eyewear that offers the contemporary man the comfort of the light-weight frame combined with a style that rejects cliché.

For the man that likes to wear a tailored suit but that also likes to explore his passions with a free spirit, these VANNI acetate or metal frames offer a perfect combination of classic shapes and courageous but unostentatious colours.

The new models in metal foil accentuate the gaze thanks to a thin, vibrantly coloured line on lug, in tonal contrast to the sombre base, that extends through the inside of the frame and onto part of the temples, in energetic hues of green, blue, red and orange. A bright detail that illuminates the classic shapes, to give both a sober element and a touch of flair to the eyeglasses.

In the acetate models, classic tortoiseshell plays with brown, red and blue tones: they are glasses in ultrathin or traditional thicknesses, that in some versions display a special 3D surface processing, achieved through use of a laser. Offered in 48-53 calibre, to fit every male face and every gradation of ophthalmic lens, they come in rectangular shapes, or leaning toward the panthos.

VANNI Eyewear is Made in Italy, for sure.
