

# VANNI

MADE IN ITALY, FOR SURE.

Remaster of VANNI:  
a collection of eyewear that reinvents the  
masterpieces of the past

**Frames that revisit the classics of eyewear design. Iconic shapes, evergreen colours and styles that have dictated the changing look of fashion in previous decades. As in the music and film industry, VANNI is remastering an ideal modern version of the timeless classic.**

#### **Raw materials:**

classic metal profiles or ultra-thin milled steel.

#### **The design detail:**

what characterizes the Re-master 2019/2020 collection is the luxurious finishing on the round metal rims that come in gloss lacquer or with two-tone acetate casings, created thanks to innovative manufacturing techniques and master craftsmanship.

#### **Shapes and colours:**

the Windsor two-tone acetate rim casings in exciting colours give the glasses an original design identity of vivacious contrast and subtle aesthetic.

Classic reigns for women's models that are soft, large and pathos shaped with more rectangular shapes for the men's collection. Some models are more daring with exaggerated silhouettes, with extra-large geometric rectangles, rounded and also hexagonal profile.

VANNI eyewear is made in Italy, for sure.
